Total Resources	\$35,627 38
Total Expenditures	33,809 51
Balance	\$ 1,817 87

The School Department expenditures during the past year, show a decrease of \$3,132.48, which is in keeping with the trend to lower town expenses. In the last three years, school expenditures have decreased \$4,274.04. This decrease has been due in a large measure to the decreased cost of teachers' salaries, supplies, and repairs: and a close budgeting system of available funds, which tends toward an efficient financial administration. The reduction has been accomplished without lowering the standards of the educational system and the schools have maintained the standards required for an Approved System. The Board of Directors believe that during the next year, the expenditures can be further reduced, and the expense budget is being made up on this basis. The Board of Directors, after a careful consideration of the matter, believes that all reductions in the department expenditures must be accomplished on a gradual scale, as a radical reduction would result in the breaking down of our school system which has been brought up to a high standard only by the expenditure of large sums. By a gradual reduction in expense the present standard can be maintained, while a radical reduction at this time, will necessarily result in measures of false economy.

Hudson School	33
Furnace School	35
Dickerman School	16
East Pittsford School	13
Total	601

Cost per pupil High School	\$ 74 43
Cost per pupil Grades	36 63
Cost per pupil average all pupils	\$ 44 94

The School Department accounts for the past year show a decrease of \$6,802.58 in actual expenditures, and a decrease of \$8,278.24 in the amount raised by town taxation, for school purposes. This decrease in resources necessarily resulted in a reorganization of the school system. The Junior High School was eliminated, grades were combined in the Lothrop and Florence Graded Schools, and the pupil attendance in the Rural Schools was increased. Vocational courses were eliminated, and the number on the teaching staff was decreased by three. All of the employees in the department were given substantial reductions in salary. However this reorganization was accomplished in such a

manner that the buildings were maintained, and the school system still enjoyed its accredited rating, and the graduates of the High School were accepted by the higher institutions of learning.

In anticipating the financial needs of the department for next year, we have two plans to offer. First, if the present system is to be continued, the present tax rate of 1.40 will be required. The second plan includes the return of the Junior High School with specialized teaching. To place this plan in effect an increase of 10 cents in the tax rate will be necessary. Due to the distinct educational advantages of this type of training in the Junior High School, the board of School Directors strongly urges the adoption of this plan.

The board of School Directors strongly recommends that a sum of \$3,000.00, to be spent as necessary, be raised to install a steam heating system in the Florence School. Experiments conducted during the first part of this winter show that the present heating unit will not meet the needs. The above mentioned amount, based upon estimates already received, will make the necessary changes to guarantee the maintaining of the necessary heat in the building.

Amount the Town has actually spent		\$4,492 00

The federal government and state government have paid in salaries in town, under CWA and VERA and state road projects during the past year from February 1, 1934 to February 1, 1935, to unemployed men, the sum of \$33,767.17.

The cost to the town, which it had to pay as its share to supply tools, materials, trucks, gravel, supervision, etc., as specified by the government was \$6,904.50. From this amount can be deducted the sum of \$2,412.50 (the state back roads fund received from the state treasurer) leaving a balance of \$4,492.00 actually spent by the town on the various relief projects.

The selectmen and the overseer, who are the committee in each town to supervise and set up the various projects that the government approves, believe they were justified in spending the town's share in the projects undertaken to provide the unemployed men in town with means of taking care of themselves and families without having to apply to the overseer for help. We believe that if the town had not cooperated in this way with the federal government that our overseer's account would have been more than the amount the town has spent, plus what he has had to spend for the town poor account. In other words, we believe it would have cost the town much more than we have spent to have taken care of its needy and unemployed had there been no federal and state aid, and in that case the town would have had nothing to show for the money spent, whereas, now we have a big improvement to many of our back roads and public buildings.

In addition to the above work relief the government has furnished the following commodities for distribution among the needy at practically no cost to the town.

20 cases of Beef	7 cases of rice
13 cases of Butter	6 cases of Cheese
10 cases of Pork	20 Baby Blankets
8 cases of Cod Liver Oil	131 tons of Coal

The following is a summary of seeds, etc., furnished by the government to 64 families in Pittsford with 372 people. For seeds, \$152.22, for fertilizer, \$166.75, for potatoes, \$181.48, for spray, \$37.85, or a total cost of supplies of \$538.30.

The following is the summary of the results of the garden and canning projects for Pittsford, 13,343 quarts canned with a value of \$3,471.84, vegetables valued at \$439.48 and potatoes valued at \$1,357.78, were in storage, and the value of vegetables consumed during the summer was estimated at \$580.47 making the total of gross returns \$5,849.57 for the project.

The above figures were furnished by the County Agricultural Agent through whose office the garden and canning projects were handled.

The government also paid a local canning supervisor and an assistant, the only cost to the town being to furnish a canning center with suitable facilities to carry on the work and a few miscellaneous items.

The following are some explanatory notes concerning the report of the School Department.

RESOURCES: Although the town voted an increase of 10% of the Grand List in the school tax, the resources for the year ending February 1, 1935 show a decrease of \$1,270.79 over the year ending February 1, 1934. This decrease is, in a large measure, due to the decreases in the following noted items: (a) From State Treasurer, \$914.48; (b) From tuition, \$162.79; (c) From Emma Burditt Pinney Fund, \$50.00, and (e) From Balance from previous year, \$1,627.33. It is hoped that the present session of the Vermont General Assembly will provide for justified increased returns from the State, thus, relieving the town of increased financial burden.

EXPENDITURES: The expenditures of the School Department for the year ending February 1, 1935 show a decrease of \$1,164.18 from the expenditures of the year ending February 1, 1934. The following items are brought to your attention:

(a) Teachers' Salaries and Supervision—show a decrease of \$2,190.99 which is due to lower salary schedules which are now in effect. It is noted that an additional teacher was added to the Lothrop Grades in September.

(b) Repairs show an increase of \$379.72. This increase is due in greater part to the refinishing and opening of an additional grade class room in the Lothrop Building. This was necessary to allow the pupils in Grades seven and eight from the Rural Districts to attend at the Lothrop building, thus, relieving overcrowded conditions in some of our Rural Schools. Also, due to the CWA more repairs were undertaken during the year, than were originally listed.

(c) Water, fuel, and lights—show an increase of \$1,532.13. This is due in greater part to increased fuel costs due to the extreme weather conditions during the latter portion of last winter, and the first part of the present winter. It may also be noted that the fuel inventory of February 1, 1935 greatly exceeds that of February 1, 1934. The cost of heating the Florence Schools is excessive, due to the present heating system in the building, which necessitates burning a grade of coal which costs approximately \$5.00 per ton more than the

grade of coal burned at the Lothrop Building. If fuel costs are to be materially reduced, a change from the present heating system in the Florence School is strongly urged.

(d) Janitor service shows a decrease of \$116.30 which is due to lower salary schedule now in effect.

(e) Transportation and board—shows a decrease of \$1,-186.41 which is due to the elimination of much transportation which was formerly furnished.

(f) Tuition shows a decrease of \$113.34 which is due to the elimination of the payment of any tuition by the School Department.

(g) Supplies—show an increase of \$316.12 which is due to a rise in prices, and also to the purchase of supplies for CWA work. It is noted here that the School Department expended the sum of \$663.44 for necessary materials to provide for CWA labor.

(h) Textbooks show a slight decrease of \$23.50. This amount will vary due to each year's needs.

(i) Insurance—shows an increase of \$121.42. This account varies with the renewal of the various policies.

A review of School Department records shows the following to be true:

Total Expenditures for year ending February 1,	
1931	\$38,083 55
Total Expenditures for year ending February 1,	
1935	\$25,842 75

Thus expenditures have decreased to the amount of \$12,-240.80 from the year of 1931. During the same period, the average number of school pupils has decreased only by thirty-two pupils, thus, the education costs have been materially reduced.

During the past ten years, the Board of School Directors has made a practice of budgeting all items of expenditures for two periods during the year; these periods ending on July 1, and February 1. Such budget items are balanced against the resources. It is the policy of the School Department to keep its expenditures within this estimated budget, and only some

necessary expense of an extremely extraordinary nature would cause an expenditure exceeding that listed in the budget. In a consideration of the budget for the year from February 1, 1935 to February 1, 1936, the Board of School Directors are of the opinion that expenditures will require the same town school tax which is 150% net of the Grand List. This amount will allow the same standards to be maintained in the school system; and it will allow for some urgently needed repairs at the Lothrop Building. Such repairs to include some inside painting of class rooms, replacing of some of the obsolete and worn out plumbing, and repairs to windows and jets. Also, the Board of School Directors feel that some of the badly worn old school furniture should be gradually replaced with new furniture. This amount will also allow for the replacement of worn out toilet tanks at some of our Rural Schools.

Team Drivers of .20 and .30 an hour teams and Truck Drivers of .70 an hour were paid from VERA or WPA payroll funds.

The Sewing Project which has been in operation since December 27, is, we think, a worth while undertaking that will be of benefit to a great many families on relief.

It is being financed about 90% by the Government, that is they pay the payroll and furnish \$600.00 worth of cloth and materials. The towns burden being only to furnish equipment, \$200.00 worth of woolen materials, miscellaneous items, and a place to do the work.

Although this project has been operating only one month, we have made clothing for 26 families.

The garden and canning project again this year was a success, the Government meeting the payrolls, and furnishing materials, while the town was only furnishing a kitchen, fuel, lights, and miscellaneous items.

---------	------------------

The following are some explanatory notes concerning the report of the School Department.

RESOURCES: The resources for the fiscal year ending February 1, 1936 show an increase of \$3,089.55 over the resources for the fiscal year ending February 1, 1935. This increase is due to the increased State Aid, which increase is \$3,664.83. Such an increase in State Aid is due to the new basis on which it is computed. It is now computed on an Average Daily Attendance basis, the State paying back to the town on each pupil attending school. The following items show a decrease for the fiscal year: a. Town Tax, \$452.92. Although the same tax was voted, a lower Grand List accounts for this decrease. b. Tuition, \$293.20. This is due to fewer tuition pupils. c. Balance \$106.61.

EXPENDITURES: The expenditures of the School Department for the year ending February 1, 1936 show an increase of \$1,338.02. The following items are brought to your attention.

(a) Teachers' Salaries and Supervision: increase of \$1,272.47. This increase is due in large part to increasing the 1935-36 school year to thirty eight weeks, causing the paying for a period of thirty seven weeks of teaching during the fiscal year. The 1934-35 school year was of thirty six weeks duration.

(b) REPAIRS: decrease of \$141.74 due to decrease in costs of some general repairs.

(c) TRANSPORTATION AND BOARD: decrease of \$241.75 due to fewer pupils being transported.

(d) SUPPLIES: increase of \$663.12. This increase is due to the starting of a Commercial Department in the High School, costing approximately the sum of \$600.00 to equip a room. This includes the cost of typewriters.

(e) INSURANCE: decrease of \$173.94. This item varies each year due to policies becoming payable.

(f) WATER, FUEL AND LIGHTS: decrease of \$477.96. This decrease is due in large part to economy in the use of fuel and a lower cost per unit.

(g) TEXT BOOKS: increase of \$165.74. This increase is due to fact that during last few years the expenditure for text books was lowered, and now it is necessary to replace more worn out books. The School Department is now once more on the standard text book improvement program.

Note: The above amounts are taken from State Report of July 1, 1935, and show the actual Resources and Expenditures for the School Year 1934-35.

The following is taken from a letter received from the State Department of Education relative to changes concerning the reporting of School Accounts.

"In Section 2 of No. 89 of the Acts of 1935, amending Section 4241, it states that the school fiscal year shall begin on July 1 and end on June 30, and in No. 87 of the Acts of 1935, amending Section 4177, it states that the school board shall prepare and include in the town report a statement for the year ending with the previous June 30, the budget for the present year, a proposed budget for the coming year, and a statement of the receipts and expenditures from the end of the last fiscal year to February 1, which means from July 1 to February 1. The law also requires the auditors to check the books up to February 1."

The above explanation places the school fiscal year for a period from July 1 to June 30, and the report of such a period would give the voters a report of the actual school year. The report now in use which extends from February 1 to January 31, gives a report for a portion of two school years. The State is of the opinion that the report for the school year is a true report. The Board of School Directors is of the opinion that the voters of the town may follow out the above law in either one of two ways.

1. If the voters desire to have the School District meeting on the same date as the Town Meeting, it will be necessary this year to have two financial appropriations for the School Department. One appropriation to extend from February 1, 1936 to June 30, 1936. The second appropriation to extend from July 1, 1936 to June 30, 1937. In other words, it means appropriating enough to operate for a year and five months.

2. If the voters desire to have the School District meeting at a suggested date between June 25 and July 1 annually, the regular financial appropriation may be made at that meeting. Such appropriation to be for the fiscal year ending the next June 30. If this measure is adopted, money enough to operate the schools from February 1, 1936 to June 30, 1936 must be appropriated at this meeting.

The financial budget of the School Department will necessarily depend upon which one of the above two measures is adopted by the voters. The Board of School Directors will prepare a financial budget for each of the above measures, and will have a recommendation for tax rate ready for the Town Meeting, and will recommend according to the adoption of one of the above measures.

The following are explanatory notes concerning the report of the School Department.

Due to the fact, that tax money now voted at March meeting, is for operating expenses, for an annual period of July to July, it is necessary to change the form of report. Table One and Two, show the operating expense for annual period from February 1, 1936 to February 1, 1937. Table Three, shows operating expense for period extending from February 1, 1936 to July 1, 1936. Town Tax voted for this period is seventy-five cents. During this period, practically the only resource available is the voted Town tax. Table Four shows operating expense for period extending from July 1, 1936 to February 1, 1937. A tax of \$1.15 and necessary borrowing power to extent of 35 cents, was voted to operate schools for period extending from July 1, 1936 to July 1, 1937. The School Department Budget is made out covering period extending from July 1, 1936 to July 1, 1937, thus, Table Four shows only a portion of the operating expense for the School Year 1936-37.

At the present time, the School Department, has a favorable balance of resources over expenditures. The School Department Budget designates rather heavy expenditures for repairs at the Lothrop Building during this last period of the school year, and has maintained a reserve for this purpose. The School Department has realized for some time, the very undesirable conditions existing in the boys' basement at the Lothrop School, and now plans to remedy these conditions. Again, the School Department plans to add more typewriters in the Commercial Department of the High School. It is estimated that these two items, will demand the spending the major portion of the balance now on hand.

HEALTH OFFICER'S REPORT

Period of July 1, 1935 to July 1, 1936

The only epidemic of importance occurring in the spring and early summer of 1936 was measles.

Our Town water supply samples were sent to the Department of Hygiene three times each year.

The reports of these tests are wholesome waters. Sanitary inspections of stores, restaurants, barber shops, etc. All school buildings were inspected.

The unusual number of complaints arising every spring and summer of rubbish and garbage dumped along the two river banks that run through the town. There should be a suitable place for these.

Physicians reported communicable diseases as follows:

Dr. Frost	Measles	69
Dr. Fregosi	Measles	6
Dr. Southworth	Measles	2
Dr. Hagan	Measles	1
Dr. Judds	German Measles	2
Families	Measles	433

Comparison of Resources	

The following is an account of major improvements made during the year, and the needs of the various school units.

LOTHROP BUILDING

REPAIRS: General repairs were maintained at this building. In addition, ten individual urinal units were installed in the boys' basement at a cost of \$1,000.00. These urinals were necessary as the old system was far from sanitary. New rubber stair treads at a cost of \$60.00 were placed on stairs. Roof repairs were made.

NEEDS: Interior painting, using correct color arrangement is needed. Much of the plumbing should be replaced, and the Board of School Directors feel that this should be done on an annual basis. Boilers should have a rigid inspection. It must be realized that this building has been in use since 1912, and much of the equipment is becoming worn and obsolete. Some of the plumbing will have to be replaced, as it is impossible to purchase new parts.

FLORENCE BUILDING

REPAIRS: General repairs were maintained, and some needed roof repairs were made.

NEEDS: Outside painting is sorely needed, as the building is weathering badly. The present heating system is very inefficient, and is becoming worn to the point where major repairs will be necessary soon. The present heating system, which is a hot-air system is very costly: investigation showing that it costs on an average of approximately \$350.00 more per year to heat the Florence School building of four rooms housing 113 pupils, than it does to heat the Lothrop School Building of eleven rooms housing 302 pupils. The Board of School Directors recommends the installation of a steam heating plant which will burn Buckwheat coal. Such a system will prove to be a large saving in fuel costs. Also, the present heating system requires the operating of a large electrically driven fan, and this means large power bills for the building. The Board of School Directors believes that an annual saving of \$500.00 could be made by the installing of steam heating at the Florence building.

DICKERMAN SCHOOL BUILDING

REPAIRS: In addition to general repairs, a new circulating heater costing \$140.00 was installed. Also, electric lights were installed at a cost of \$31.00. New fencing was placed around the school property, at cost of \$25.53. New curtains installed at cost of \$25.11.

NEEDS: This building is not in immediate need of other than general repairs which are considered in the financial budget.

FURNACE SCHOOL BUILDING

REPAIRS: General repairs were maintained. In addition, roof repairs to the extent of \$58.76 were necessary to repair damage caused by falling tree.

NEEDS: A new circulating heater is needed, and is now on order. The windows should be tightened and generally repaired. New fencing should be placed around the school property.

GOODNOUGH SCHOOL BUILDING

REPAIRS: Regular repairs were maintained. In addition new chemical toilet tanks costing approximately \$160.00 were installed.

NEEDS: In addition to general repairs, the foundation of this building should be rebuilt, and proper fencing should be maintained.

HUDSON SCHOOL BUILDING

REPAIRS: In addition to general repairs, it was necessary to replace worn out roof of woodshed with slate at cost of \$30.75.

NEEDS: This building needs both exterior and interior painting, and proper fencing of the school property. Also proper drainage should be maintained in front of the building.

EAST PITTSFORD SCHOOL BUILDING

REPAIRS: General repairs were maintained.

NEEDS: This building may be condemned for school purposes, due to the fact that it is too close to the highway, and opens immediately on to the highway. There is not land enough on the present site to remedy the situation. The pupils do not have any land for playground purposes, and of necessity are often playing on the highway, which is dangerous. Toilet conditions are not satisfactory, and a new woodshed is an immediate need. The Board of School Directors feel that this building should be moved across the highway from its present location, on to a plot of land to be purchased for that purpose. It is the opinion of the Board of School Directors that this building could be moved and put into proper condition for a sum not less than \$600.00.

GENERAL NOTE

A study of the above report shows that the School Department is facing a serious problem of needed repairs at the various

school units. These needed repairs have accumulated over a period of years, due to the fact that the School Tax of \$1.50 on the Grand List allows only for regular annual repairs and minor repairs. A study of the budget in this report indicates that the School Tax of \$1.50 allows approximately the sum of \$500.00 annually for repairs, and this amount will not take care of many needed repairs requiring large expenditures. The Board of School Directors, after a study of this situation recommends, as a solution of this problem, a special school tax of five cents net on the grand list; such sum to be spent only on large repair items, and a special report of such expenditure to be made in the report of February 1, 1939. The Board of School Directors feels that if this special tax of five cents were raised for a short period of years; it would avoid the necessity of raising a large additional school tax at some meeting in the near future, when many needed repairs would have to be done within a period of one year. In other words, this plan would spread the cost of needed repairs over a period of years.

NOTES: The above budget indicates that it requires a school tax of \$1.50 net on the grand list for general operating expenses of the schools. This amount allows only for general repairs, and will not care for many of the large items listed under the needs of the various school units.

BUDGET OF RESOURCES

	July 1, 1937 to July 1, 1938	July 1, 1938 to July 1, 1939
Town—\$1.50 on present Grand List	\$23,001 03	\$23,000 00

Emma Burditt Pinney Fund	200 00	200 00
Rent of School Lands	78 96	79 00
Tuition	180 00	225 00
Totals	\$27,999 99	\$28,004 00

NOTES: From the above budget of anticipated resources, it is noted that the School Department is asking for a school tax of \$1.50 net on the grand list, for general operating expense for the fiscal year from July 1, 1938 to July 1, 1939. This is the same tax which is in effect for the fiscal year from July 1, 1937 to July 1, 1938.

The financial rebate from the State Treasurer is now based upon the number of equated pupils attending school during the previous school year. This financial rebate comes to the general school fund, and is not marked for any special type of expenditure.

SCIENCE LABORATORY AT THE LOTHROP BUILDING

There is a very pressing need of a science laboratory at the Lothrop building in connection with the Science Courses offered at the High School. Up to the present time, it has been possible to meet the requirements of an Approved School, by the use entirely of the Lecture-Demonstration method in the Science Courses offered. Now, it is imperative that Chemistry be offered at the High School, if our school is to maintain its standing on the Approved List in the State and New England. Also, those pupils who go on to study Nursing must have had Chemistry in High School. Those pupils who go on to College should have a course in Chemistry. Also, a course in Chemistry is of much practical use to those pupils who do not go on to higher training. With a laboratory the following courses could be offered at High School: General Science, Biology, Physics and Chemistry. Chemistry and Physics could be offered on alternate years. Thus, a pupil could have a good course in four sciences.

Investigation indicates that the installation of such a laboratory with the necessary equipment to start the laboratory work on a good basis will require a tax of ten cents on the grand list. The Board of School Directors recommends that a special tax of ten cents be raised for this purpose, and a report of expenditure of the funds so raised, be made in the Town Report of February 1939. After the laboratory is installed, there would be an additional annual cost of approximately \$250.00 for additional equipment, breakage, chemical reagents, etc.
